

CyberOptics to Debut Its Conformal Coating Inspection Solution at SMTA International

CyberOptics Corporation (Nasdaq: CYBE) announces that it will launch its CX150i™ Conformal Coating Inspection system in Booth #218 at SMTA International, scheduled to take place Sep. 30 - Oct. 1, 2014 at the Donald Stephens Convention Center in Rosemont, IL. The multi-award winning SE600™ 3D SPI system will also be displayed at the show. All CyberOptics' inspection solutions come with the assurance of quality, accuracy and speed.

The new CX150i™ system offers simple, fast and reliable conformal coating inspection using a brand-new UV Strobed Inspection Module (SIM). Designed with an 80 Megapixel sensor, CX150i™ offers white light illumination for component presence/absence inspection and UV illumination for conformal coating inspection. Powered by AI² (Autonomous Image Interpretation) technology, CX150i™ enables faster, simpler and smarter programming. Conformal coating inspection plays a critical role in ensuring consistency and quality conformal coating.

The SE600™ 3D SPI system delivers 'true' volume measurement and world-class usability. Designed with a state-of-the-art dual illumination sensor, it offers the best repeatability and reproducibility – even on the smallest paste deposits. The award-winning SPIv5 series software offers full touch screen capability and world-class user experience for easy, flawless inspection. CyberPrint OPTIMIZER™, a unique value-add program, that automatically optimizes your printing process is part of the SE600™ software portfolio.

The SE600™ 3D SPI and CX150i™ ACI systems will be featured during the Tech Tours on Tuesday, Sept. 30 from 3:30 – 5 p.m. and Wednesday, Oct. 1 from 12:30- 2 p.m. New to SMTA International, the Tech Tours present a unique opportunity to participate in a technology focused tour on the exhibit floor. These tours will showcase the latest technologies, equipment and solutions in a small group setting. Exhibiting partners will provide a demo, a short technology-based presentation or specific application support.

About CyberOptics

Founded in 1984, CyberOptics Corporation is a leading provider of sensors and inspection systems that provide process yield and through-put improvement solutions for the global electronic assembly and semiconductor capital equipment markets. Our products are deployed on production lines that manufacture surface mount technology circuit boards and semiconductor process equipment. Through internal development and acquisitions, CyberOptics is strategically repositioning itself to become a global leader in high-precision 3D sensors. Headquartered in Minneapolis, Minnesota, CyberOptics conducts worldwide operations through facilities in North America, Asia and Europe.

Statements regarding the Company's anticipated performance are forward-looking and therefore involve risks and uncertainties, including but not limited to: market conditions in the global SMT and semiconductor capital equipment industries; increasing price competition and price pressure on our product sales, particularly our SMT systems; the level of orders from our OEM customers; the availability of parts required for meeting customer orders; unanticipated product development challenges; the effect of world events on our sales, the majority of which are from foreign customers; product introductions and pricing by our competitors; the level of revenue and loss we record in 2014; the success of our 3D technology initiatives; expectations regarding LDI and its impact on our operations; integration risks associated with LDI and other factors set forth in the Company's filings with the Securities and Exchange Commission.
