

CyberOptics to Exhibit High-Speed, High Accuracy SQ3000 3D AOI at productronica Germany

Minneapolis, Minnesota — October 2015 — [CyberOptics® Corporation](#) (NASDAQ: CYBE) today announced that it will exhibit in Hall A2, Booth 459 at the productronica International Trade Fair, scheduled to take place Nov. 10-13, 2015 at the Messe München exhibition center in Munich, Germany. Company representatives will showcase CyberOptics' new SQ3000™ 3D Automated Optical Inspection (AOI) system and launch advanced new product features.

The SQ3000™ 3D AOI system maximizes ROI and line utilization with multi-view 3D sensors that capture and transmit data simultaneously, and in parallel, accelerating 3D inspection speed versus alternate technology. The proprietary Multi-Reflection Suppression (MRS) technology combined with the highly sophisticated 3D fusing algorithms offers microscopic image quality at production speeds. An easy-to-use, intuitive interface with touch control facilitates minimal training and operator interaction.

Also on display, the SE600™ 3D SPI system delivers 'true' volume measurement and world-class usability. Designed with a state-of-the-art dual illumination sensor, it offers the best repeatability and reproducibility – even on the smallest paste deposits. The award-winning software offers full touch screen capability and world-class user experience for easy, flawless inspection.

About CyberOptics

CyberOptics Corporation (NASDAQ: CYBE) is a leading global developer and manufacturer of high precision sensing technology solutions. CyberOptics sensors are being used in general purpose metrology and 3D scanning, surface mount technology (SMT) and semiconductor markets to significantly improve yields and productivity. By leveraging its leading edge technologies, the company has strategically established itself as a global leader in high precision 3D sensors, allowing CyberOptics to further increase its penetration of its key vertical segments. Headquartered in Minneapolis, Minnesota, CyberOptics conducts worldwide operations through its facilities in North America, Asia and Europe.

Statements regarding the Company's anticipated performance are forward-looking and therefore involve risks and uncertainties, including but not limited to: market conditions in the global SMT and semiconductor capital equipment industries; increasing price competition and price pressure on our product sales, particularly our SMT systems; the level of orders from our OEM customers; the availability of parts required to meet customer orders; unanticipated product development challenges; the effect of world events on our sales, the majority of which

are from foreign customers; rapid changes in technology in the electronics markets; product introductions and pricing by our competitors; the success of our 3D technology initiatives; expectations regarding LDI and its impact on our operations; integration risks associated with LDI and other factors set forth in the Company's filings with the Securities and Exchange Commission.
