

## CyberOptics' 3D SPI Offers Unsurpassed Price-Performance Advantages – Get a Live Demo at productronica India

Minneapolis, Minnesota — August 2016 — [CyberOptics® Corporation](http://www.cyberoptics.com) (NASDAQ: CYBE) today announced that it will exhibit in Booth #3161 with Maxim SMT at [productronica India](http://www.productronica.com) scheduled to take place Sept. 21-23, 2016 at the Bangalore International Exhibition Centre. CyberOptics' will demonstrate the award-winning SQ3000™ 3D Automated Optical Inspection (AOI) system that is increasingly being adopted by customers as a best-in-class solution. Additionally, the SE500-II™ 3D SPI system designed to offer unsurpassed price-performance advantage, will be on display.

The SQ3000™ 3D AOI system maximizes ROI and line utilization with multi-view 3D sensors that capture and transmit data simultaneously, and in parallel, accelerating 3D inspection speed versus alternate technology. The proprietary Multi-Reflection Suppression (MRS) technology combined with the highly sophisticated 3D fusing algorithms offers microscopic image quality at production speeds. An easy-to-use, intuitive interface with touch control facilitates minimal training and operator interaction.

The SE500-II™ can inspect the most demanding assemblies at >80 cm<sup>2</sup>/sec inspection speed without compromising on measurement accuracy. The SE500-II™ offers world-class usability with an intuitive touch-screen interface and includes a unique value-add program, CyberPrint OPTIMIZER™ that automatically optimizes the printing process.

### About CyberOptics

CyberOptics Corporation ([www.cyberoptics.com](http://www.cyberoptics.com)) is a leading global developer and manufacturer of high precision sensing technology solutions. CyberOptics' sensors are used in general purpose metrology and 3D scanning, surface mount technology (SMT) and semiconductor markets to significantly improve yields and productivity. By leveraging its leading edge technologies, the company has strategically established itself as a global leader in high precision 3D sensors, allowing CyberOptics to further increase its penetration of key vertical segments. Headquartered in Minneapolis, Minnesota, CyberOptics conducts worldwide operations through its facilities in North America, Asia and Europe.

Statements regarding the Company's anticipated performance are forward-looking and therefore involve risks and uncertainties, including but not limited to: market conditions in the global SMT and semiconductor capital equipment industries; increasing price competition and price pressure on our product sales, particularly our SMT systems; the level of orders from our OEM customers; the availability of parts required to meet customer orders; unanticipated product development challenges; the effect of world events on our sales, the majority of which are from foreign customers; rapid changes in technology in the electronics markets; product introductions and pricing by our competitors; the success

of our 3D technology initiatives, including CyberGage360, and other factors set forth in the Company's filings with the Securities and Exchange Commission.
