

CyberOptics to Demonstrate Award Winning Technology at SMT/Hybrid/Packaging

Minneapolis, Minnesota — March 24, 2016 — [CyberOptics® Corporation](#) (NASDAQ: CYBE) a global leading developer and manufacturer of high precision sensors, announces that it will exhibit in Booth # 7-109 (smartTec GmbH) at the upcoming SMT/Hybrid/Packaging show, scheduled to take place April 26-28, 2016 at the Messe in Nuremberg, Germany. CyberOptics will demonstrate the SE600™ and the award winning SQ3000™ 3DAOI.

CyberOptics recently won the 2015 Global Technology Award in the category of Inspection – AOI for its 3D SQ3000 Automated Optical Inspection (AOI) system. The system maximizes ROI and line utilization with multi-view 3D sensors that capture and transmit data simultaneously, and in parallel, accelerating 3D inspection speed versus alternate sensor platforms. The proprietary Multi-Reflection Suppression (MRS) technology combined with the highly sophisticated 3D fusing algorithms offers microscopic image quality at production speeds. An easy-to-use, intuitive interface with touch control facilitates minimal training and operator interaction.

“Customers have been rapidly adopting our 3D AOI systems. The positive feedback we have received about the superior image quality and the overall performance that the MRS technology enables, is very encouraging,” said Dr. Subodh Kulkarni, President and CEO, CyberOptics.

CyberOptics will also demonstrate the SE600™ 3D SPI system that delivers ‘true’ volume measurement and world-class usability. Designed with a state-of-the-art dual illumination sensor, it offers the best repeatability and reproducibility – even on the smallest paste deposits. The award-winning software offers full touch screen capability and world-class user experience for easy, flawless inspection.

About CyberOptics

CyberOptics Corporation (NASDAQ: CYBE) is a leading global developer and manufacturer of high precision sensing technology solutions. CyberOptics sensors are being used in general purpose metrology and 3D scanning, surface mount technology (SMT) and semiconductor markets to significantly improve yields and productivity. By leveraging its leading edge technologies, the company has strategically established itself as a global leader in high precision 3D sensors, allowing CyberOptics to further increase its penetration of its key vertical segments. Headquartered in Minneapolis, Minnesota, CyberOptics conducts worldwide operations through its facilities in North America, Asia and Europe.

Statements regarding the Company’s anticipated performance are forward-looking and therefore involve risks and uncertainties, including but not limited to: market conditions in the global SMT and semiconductor capital equipment industries; increasing price competition and price pressure on our product sales, particularly our SMT systems; the level of orders from our OEM customers; the availability of parts required to meet customer orders; unanticipated product development challenges; the effect of world events on our sales, the majority of which are from foreign customers; rapid changes in

technology in the electronics markets; product introductions and pricing by our competitors; the success of our 3D technology initiatives and other factors set forth in the Company's filings with the Securities and Exchange Commission.
