

CyberOptics Wins Its Third Award for the New SQ3000 3D AOI

MINNEAPOLIS, MN — Nov. 11, 2015 — [CyberOptics® Corporation](#) (NASDAQ: CYBE) announces that it was awarded a 2015 Global Technology Award in the category of Inspection – AOI for its SQ3000™ 3D Automated Optical Inspection (AOI) system. The award was presented to the company during a Tuesday, Nov. 10, 2015, ceremony that took place at the Messe München exhibition center in Munich, Germany during [productronica](#), the world's leading trade fair for electronics development and production. This marks the third award for the SQ3000 3D AOI since its introduction this year.

The SQ3000 3D AOI system maximizes ROI and line utilization with multi-view 3D sensors that capture and transmit data simultaneously, and in parallel, accelerating 3D inspection speed versus alternate technology. The proprietary Multi-Reflection Suppression (MRS) technology combined with the highly-sophisticated 3D fusing algorithms offers microscopic image quality at production speeds. An easy-to-use, intuitive interface with touch control facilitates minimal training and operator interaction.

“We are honored to be chosen as the winner of this prestigious award,” said Dr. Subodh Kulkarni, president and chief executive officer, CyberOptics. “Congratulations to our CyberOptics team behind the development of the proprietary technology that enables our leadership in the key attributes that matter most to our customers - accuracy, speed and ease-of-use.”

Premiering in 2005, the Global Technology Awards program is an annual celebration of product excellence in electronics surface mount assembly. Premier products based on the finest examples of creative advancement in technology are chosen by a distinguished panel of industry experts.

About CyberOptics

CyberOptics Corporation (NASDAQ: CYBE) is a leading global developer and manufacturer of high precision sensing technology solutions. CyberOptics sensors are being used in general purpose metrology and 3D scanning, surface mount technology (SMT) and semiconductor markets to significantly improve yields and productivity. By leveraging its leading edge technologies, the company has strategically established itself as a global leader in high precision 3D sensors, allowing CyberOptics to further increase its penetration of its key vertical segments. Headquartered in Minneapolis, Minnesota, CyberOptics conducts worldwide operations through its facilities in North America, Asia and Europe.

Statements regarding the Company's anticipated performance are forward-looking and therefore involve risks and uncertainties, including but not limited to: market conditions in the global SMT and semiconductor capital equipment industries; increasing price competition and price pressure on our product sales, particularly our SMT systems; the level of orders from our OEM customers; the availability of parts required to meet customer orders; unanticipated product development challenges; the effect of world events on our sales, the majority of which are from foreign customers; rapid changes in technology in the electronics markets; product introductions and pricing by our competitors; the success of our 3D technology initiatives; expectations regarding LDI and its impact on our operations; integration risks associated with LDI and other factors set forth in the Company's filings with the Securities and Exchange Commission.
